William III A.M. Claydon 2014-06-11 William III, William of Orange (1650-1702), is a key figure in English history. Grandson of Charles I and married to Mary, eldest daughter of James II, the pair became the object of protestant hopes after James lost the throne. Though William was personally unpopular - his continental ties the source of suspicion and resentment - Tony Claydon argues that William was key to solving the chronic instability of seventeenth-century Britain and Ireland. It took someone with a European vision and foreign experience of handling a free political system, to end the stand-off between ruler and people that had marred Stuart history. Claydon takes a thematic approach to investigate all these aspects in their wider context, and presents William as the crucial factor in Britain's emergence as a world power, and as a model of open and participatory government.

Popular Entertainment, Class, and Politics in Munich, 1900-1923 Robert Eben Sackett 1982 From the turn of the century until 1923, the year of the National Socialist putsch, popular entertainment in Munich reflected the sentiments and ideas of its largely middle-class audience. While industrialization, rapid urbanization, World War I, and the German Revolution of 1918-19 created an atmosphere of turbulent change, performances on Munich's popular stages gave voice to the continuity of several basic attitudes: patriotism; nostalgia for a preindustrial, rural community; hostility toward Jews; and increasing anxiety over social status. In songs, monologues, skits, and one-act plays, popular entertainers articulated views common to Munich's traditional middle class of tradesmen and shopkeepers and its "new" or white-collar middle class of clerks and minor officials. Folksingers Karl Valentin and Weiss Ferdl serve as examples of this relationship between politics and culture. They shared their audience's class background and sympathies, and in the cabarets and music halls their songs dealt with vexed social and political issues. This intriguing book in cultural history adds to our understanding of social conditions preparing the way for political change. A model case study, it explores the roots of Nazism in a large urban setting.

A Manual of Gold and Silver Coins of All Nations, Struck Within the Past Century Jacob Reese Eckfeldt 1842 "[The book contains] one medal engraving from a daguerreotype, by Joseph Saxton, of the front of the Mint, using a medal ruling machine, to copy a relief executed by Christian Gobrecht from the daguerreotype...This book is considered the first publication from a daguerreotype in the United States. A remarkable example of this little used process and of major importance in the history of photography and photomechanical printing in the United States. Joseph Saxton not only produced the oldest extant daguerreotype now in the United States, but also invented the modification to the ruling machine used for this publication."--Hanson Collection catalog, p. 8.

International Relations Theory and European Security Lorenzo Cladi 2015-08-20 This book engages with key contemporary European security issues from a variety of different theoretical standpoints, in an attempt to uncover the drivers of foreign policy and defence integration in the EU. Although European foreign policy has been attracting an ever-increasing number of International Relations (IR) scholars since the end of the Cold War, consensus on what drives European foreign policy integration has not yet emerged. This book seeks to encourage debate on this issue by examining a wide range of high-profile security issues which have roused significant interest from policy makers, academics and the public in recent years. The volume discusses, amongst other issues, the strategic posture of the European Union as a security actor, the troubled relationship with Russia, the debate regarding France's relations with the US following France's rapprochement with NATO and the EU's influence in the Israeli-Palestinian conflict. The collective intent of the contributors to highlight the drivers of EU foreign policy and defence integration ties together the wide variety of topics covered in this volume, forming it into a comprehensive overview of this issue. By paying considerable attention not just to the internal drivers of EU cooperation, but also to the critical role played by the US as an incentive or obstacle to European security, this book presents a unique contribution to this field of debate. This book will be of much interest to students of European security, IR theory, Transatlantic Relations, European politics and EU foreign policy.

Labour Market Effects of European Intergration in the Bavarian and Czech Border Regions Michael Moritz 2009-10-12 Welche Auswirkungen hatte der Fall des Eisernen Vorhangs und die ökonomische Integration der mittelosteuropäischen Staaten für den Arbeitsmarkt in den Grenzregionen zwischen den alten und den neuen EU-Mitgliedsstaaten? Michael Moritz geht dieser Frage am Beispiel der bayerisch-tschechischen Grenzregion nach. Moritz untersucht für beide Länder, ob die räumliche Nähe für die Entwicklung der Wirtschafts-, Qualifikations- und Lohnstrukturen in den grenznahen Kreisen eine Rolle spielt und inwieweit sich signifikante Unterschiede zur Entwicklung in den grenzfernen Regionen feststellen lassen.
