*Revisiting Feminist Approaches to Art Therapy* Susan Hogan 2012 This first book-length critical study of Jeremy Irons concentrates on his key performances and acting style. Through the analysis of some of the major screen roles in Irons' career, such as Brideshead Revisited, The French Lieutenant's Woman, Reversal of Fortune, Swann in Love, Dead Ringers, and Lolita, Mark Nicholls identifies a new masculine identity that unites them: 'the prince of perversion', an emblematic figure of the 1980s and 1990s presented as an alternative to the action hero or the common man. Using clear explanations of complex theoretical ideas, this book investigates Jeremy Irons's performances through the notion of perversion, both as sexual inversion and as a form of social rebellion, to uncover an entirely original but recognizable screen type.

*Disabling Perversions* Alan Corbett 2018-04-24 The book offers an overview of how to work with some of the most damaged members of society - children and adults with intellectual disabilities who abuse others. Drawing on insight from two decades of clinical work, the author examines how to assess risk and danger in the forensic disability patient, ways of working therapeutically with patients at all ends of the disability spectrum, and how to support members of the patient's network. Combining psychoanalytic, creative, forensic and systemic thinking, the book provides a template for assessing, managing, containing and treating those who present with multiple diagnoses, including cognitive and physical disabilities, mutism, psychiatric disorders and autism. Both group and individual approaches are examined. As our awareness of the incidence of forensic patients who also have disabilities increases, this work is a timely placing of the forensic disability patient onto the clinical agenda, and has a wide application, being of use to clinicians in the private consulting room, the community, the secure setting and the prison.

*Inclusive Communities* Andrew Azzopardi 2012-09-11 The term "Inclusive Communities" has increasingly featured in recent years, at policy, practice and theoretical levels, drawing from different disciplinary standpoints. Much of this has been spurred by efforts at understanding the exclusions confronted by certain populations, to develop the notion of and mechanisms by which communities can include those who are marginalised and/or oppressed, and in some contexts to 'bring back' community as something real or imagined. In spite of this, this deceptive term remains shrouded in epistemological darkness, conveniently endorsed but often little theorised and less understood. This text provides an exciting introductory textbook, drawing academics, policy makers and activists from various fields to theorise, create new and innovative conceptual platforms and develop further the hybrid idea of inclusive communities.

Each chapter describes a different element of therapeutic photography, including storytelling through photographs to discuss relationships and the use of self-portraits and selfies to explore identity. Exercises, reflection points and examples are provided throughout and a detailed case study shows the approaches described in the book used with a group of young adults on the autism spectrum. An adaptable programme is also included in the appendix.

This practical guide can be used in group work across a broad range of contexts, including in schools, colleges, youth groups, community settings, residential care, in-patient and day hospitals. **Pictures Bring Us Messages** Alison Kay Brown 2006-01 In 1925, Beatrice Blackwood of the University of Oxford's Pitt Rivers Museum took thirty-three photographs of Kainai people on the Blood Indian Reserve in Alberta as part of an anthropological project. In 2001, staff from the museum took copies of these photographs back to the Kainai and worked with community members to try to gain a better understanding of Kainai perspectives on the images. 'Pictures Bring Us Messages' is about that process, about why museum professionals and archivists must work with such communities, and about some of the considerations that need to be addressed when doing so. Exploring the meanings that historic photographs have for source communities, Alison K. Brown, Laura Peers, and members of the Kainai Nation develop and demonstrate culturally appropriate ways of researching, curating, archiving, accessing, and otherwise using museum and archival collections. They describe the process of relationship building that has been crucial to the research and the current and future benefits of this new relationship. While based in Canada, the dynamics of the 'Pictures Bring Us Messages' project is relevant to indigenous peoples and heritage institutions around the world.

This deeply human subject is relevant not only to practitioners of psychotherapy, but to all of us, as we sometimes go through difficult times in life. Starting with an introduction to basic narrative theories and the therapeutic effects of storytelling, the book then moves on to a series of lucid case studies. The authors present a diversity of material such as blogs, poetry, magazines, memoirs, and oral accounts from Antiquity to the present. Authors from several different disciplines make for a diversity of perspectives. The authors specialise in folkloristics, psychology, writing studies, poetry therapy, and classical studies.

This book will be essential reading for all mental health professionals working with psychosis including psychoanalysts, psychiatrists, psychologists and social workers.

***A Therapist's Guide to Treating Eating Disorders in a Social Media Age*** Shauna Frisbie 2020-09-08 An innovative therapeutic approach for counteracting the impact of social media on eating disorders and identity formation. All humans need space to think, to be, and to process without constant distraction. This is especially true of adolescents and young adults, for whom identity formation is a consuming task. Social media has generated both a place for the creation of identity and an audience. But constant connection leaves little space without intrusion from others. For those with body dissatisfaction and/or eating disorders, living in today's world can be especially challenging, and viewing images on social media and other online formats can be devastating. Shauna Frisbie utilizes phototherapy techniques to view client-selected images (whether they be of themselves or others) to help uncover underlying messages that are impacting their relationship to their bodies. Integrating concepts of healing narratives, neuroscience, and phototherapy, this book will help any therapist promote self-compassion, self-reflection, and healing in their clients.

***Beyond the Smile*** Chris Scott 2020-11-25 This book is a result of 12 amazing women who accepted the challenge and made a decision to allow the World to take a peek "Beyond the Smile" they wear so well. Several months ago, The Holy Spirit gave me the title of this book. I took time and wrote down ten titles to include "Beyond the Smile", but wanted to give the co-authors an opportunity to help select the right one. Although I knew what God had already spoken, I sent them all ten titles and ask that they each select the three top choices. God had spoken again as the top choice was "Beyond the Smile", after the second round of voting. Let's go a little deeper on the choice in naming the book. The women in this compilation of amazing stories tell their truths of smiling while hurting and wounded. I sometimes call it "serving while hemorrhaging." Many women can relate to living their daily lives while much is going on within, but yet they smile. There are many times that we endure betrayal, negativity, and fear, yet we still smile. Most of the times, those closest to us don't even know what is going on within the depths of our souls. These women of strong FAITH, who I affectionately call Queens, have emptied themselves onto paper and has discovered the therapeutic necessity of telling their truth to bless other women. The launching of this book was as though we each released a thousand doves. It is a symbolization of freedom and self-awakening. God created for us, a sister circle of support for one another that will live forever. We each found strength and confidence in prayer and the love that has been displayed birthed victory in abundance. Sit back, grab you warm throw blanket and a glass of your favorite drink as we go "Beyond the Smile" of my co-authors Ashley Brittney, Consuelo Allen, Detral Williams, Kenyatta Collins, LaQuanda Plantt, Mia Colemon, Michelle Hudson, Renata Triblett, Sharon P. Jones, Zen Watson, Tonya Clinton, and Ynwanda S. Market.

***Therapeutic Uses of Rap and Hip-Hop*** Susan Hadley 2012-05-22 In perceiving all rap and hip-hop music as violent, misogynistic, and sexually charged, are we denying the way in which it is attentive to the lived experiences, both positive and negative, of many therapy clients? This question is explored in great depth in this anthology, the first to examine the use of this musical genre in the therapeutic context. The contributors are all experienced therapists who examine the multiple ways that rap and hip-hop can be used in therapy by listening and discussing, performing, creating, or improvising. The text is divided into three sections that explore the historical and theoretical perspectives of rap and hip-hop in therapy, describe the first-hand experiences of using the music with at-risk youth, and discuss the ways in which contributors have used rap and hip-hop with clients with specific diagnoses, respectively. Within these sections, the contributors provide rationale for the use of rap and hip-hop in therapy and encourage therapists to validate the experiences for those for whom rap music is a significant mode of expression. Editors Susan Hadley and George Yancy go beyond promoting culturally competent therapy to creating a paradigm shift in the field, one that speaks to the problematic ways in which rap and hip-hop have been dismissed as expressive of meaningless violence and of little social value. More than providing tools to incorporate rap into therapy, this text enhances the therapist's cultural and professional repertoire.

***Developments*** Erica Burman 2008-02-19 How does developmental psychology connect with the developing world? What do cultural representations tell us about the contemporary politics of childhood? What is the political economy of childhood? This companion volume to Burman's *Deconstructing Developmental Psychology* helps us to explain why questions around children and childhood - their safety, their sexuality, their interests and abilities, their violence - have so preoccupied the late twentieth and twenty-first centuries. In this increasingly post-industrial, post-colonial and multicultural world, this book identifies analytical and practical strategies for improving how we think about and work with children. Drawing in particular on feminist and postdevelopment literatures, the book illustrates how and why reconceptualising our notions of individual and human development, including those informing models of children's rights and interests, will foster more just and equitable forms of professional practice with children and their families. The book brings together completely new, previously unpublished material alongside revised and updated papers to present a cutting-edge and integrated perspective to the field. Burman offers a key contribution to a set of urgent debates engaging theory and method, policy and practice across all the disciplines that work with, or lay claim to, children's interests. *Developments* presents a coherent and persuasive set of arguments about childhood, culture and professional practice so that the sustained focus across a range of disciplinary arenas (psychology, education, cultural studies, child rights, gender studies, development policy and practice, social policy) strengthens the overall argument of each chapter. It will be invaluable to teachers and students in psychology, childhood studies and education as well as researchers in gender studies. It will also be a must-read for professionals working with children and adolescents.
