Interventional Oncology Jean-François H. Geschwind 2008-09-15 Interventional oncology has joined surgical, radiation, and medical oncology as the fourth pillar of cancer care. Advances in imaging and image guidance for the

detection, characterization, targeting, and therapy of cancer now allow for minimally invasive image-guided treatment of many solid tumors without the morbidity of open surgery or the toxicity of chemotherapy and radiation. The editors have brought together the accrued

experience of pioneers and leaders in image-guided cancer therapy from around the globe to create the first comprehensive text for this emerging field. Covering the biology, techniques, clinical applications, and outcomes of interventional oncologic procedures for the treatment and palliation of solid tumors throughout the body, this practical reference will be indispensable for physicians across specialties who seek to provide collaborative, leading-edge care to cancer patients.

Walsh 2013-05-13 *Advances in Vocational Psychology* devoted to presenting and evaluating important advances in the field of interest measurement. Progress in three well known interest inventories -- the Strong Campbell Interest Inventory, the Kuder Occupational Interest Survey, and the Self Directed Search -- is closely examined. A focus on innovations in interest measurement directs attention to how more recent instruments provide technical and conceptual advances over older, more reliable ones. Both research and counseling perspectives combine to provide a well-balanced guide to the study of vocational psychology. How interest inventories can be used beneficially in the career counseling of minority and majority populations is also explored.
