**Ethan Frome** Edith Wharton 2018-12-19 In Ethan Frome volgen we de levens van een aantal mensen in een klein dorpje op het platteland van New England aan het begin van de twintigste eeuw. De verteller is voor zaken in het dorp en raakt daar geïntrigeerd door een gekweld uitziende man, Ethan Frome, en besluit meer over hem te weten te komen. Vervolgens vertelt het boek het levensverhaal van Ethan, zijn ziekelijke vrouw Zeena en haar nicht Mattie, die op fatale wijze tot elkaar veroordeeld raken. Het boek is in 1993 verfilmd met Liam Neeson in de titelrol. Edith Wharton (1862-1932) was een Amerikaanse schrijfster en de eerste vrouw die met de prestigieuze Pullitzerprijs werd bekroond, voor haar beroemde boek The Age of Innocence uit 1920. *Preservation Management* John Feather 1996 Much has happened in libraries and information in the last ten years and preservation and conservation issues have developed accordingly. The authors carried out a survey of around 500 British libraries to study preservation management practices over that period and the results of this questionnaire are the basis of this book. In analysing the responses it was clear that the fundamental issues about the access to and use of books were being addressed; preservation and retention of materials and media being the foundation of access. Having put the research into its historical context, the book moves on to the findings about management attitudes and practices. Policy issues are considered, and some of the national and international prescriptive policy documents issued by professional organizations are compared with those from the British libraries. The differences between the two form the basis of suggestions about how individual libraries might develop preservation policies and also what national policies could be considered. This is a book that will enable all librarians from all sectors to understand the importance and nature of preservation policies and to begin to create or improve their own.

*Building a Digital Repository Program with Limited Resources* Abby Clobridge 2010-09-24 Whether you are just starting to create a digital repository or your institution already has a fully-developed program, this book provides strategies for building and maintaining a high-use, cohesive, and fiscally-responsible repository with collections that showcase your institution. The book explains how to strategically select projects tied to your institution's goals, create processes and workflows designed to support a fully-functioning program, and creatively utilize existing resources. The benefits of taking a holistic approach to creating a digital repository program rather than focusing only on individual collections are discussed. Case studies and best practices from various institutions round out the author's practical suggestions. Focuses on the bigger picture of repository work (creating a unified, cohesive program) but also includes suggestions for effectively implementing digital projects of all shapes and sizes Focuses on doing more with less – strategies that are perfect for smaller institutions or institutions which want to be fiscally responsible when it comes to building and sustaining digital repository programs Includes ready-to-use templates, worksheets, workshop exercises, and assessment tools written by the author

*Thomson Handbook* David Blakesley 2006-08 THE THOMSON HANDBOOK, PREVIEW EDITION is an early look at the rhetorical handbook for the digital age. THE THOMSON HANDBOOK puts students' writing front and center with an innovative page format that keeps students' attention focused on their own writing and on activities, checklists, projects, and visual aids that help them write. The page design and innovative visuals make information about writing, reading, research, documentation, technology, and grammar easy for students to access and understand. To accomplish their writing tasks, students are taught to ground their rhetorical decisions in the specific context in which they are writing. As a further aid to writing and research, THE THOMSON HANDBOOK gives students more and better information on using technology than any other handbook. Technology Toolboxes throughout, as well as two dedicated parts of the book (Parts 5 and 6), teach students how to apply technology to their writing tasks, whether the task is to write a personal essay, a persuasive essay, a critical review, a photographic essay, a technology autobiography, a blog, a website, or more than twenty other different kinds of writing projects.

*Engaging in the Scholarship of Teaching and Learning* Cathy Bishop-Clark 2012-10-29 This is a book for anyone who has ever considered engaging in the scholarship of teaching and learning – known familiarly as SoTL – and needs a better understanding of what it is, and how to engage in it. The authors describe

how to create a SoTL project, its implications for promotion and tenure, and how it fosters: \* Increased satisfaction and fulfillment in teaching \* Improved student learning \* Increased productivity of scholarly publication \* Collaboration with colleagues across disciplines \* Contributing to a growing and important body of literature This guide provides prospective SoTL scholars with the necessary background information, foundational theory, tools, resources, and methodology to develop their own SoTL projects, taking the reader through the five stages of the process: Generating a research question; Designing the study; Collecting the data; Analyzing the data; and Presenting and publishing your SoTL project. Each stage is illustrated by examples of actual SoTL studies, and is accompanied by worksheets to help the reader refine ideas and map out his or her next steps. The process and worksheets are the fruit of the successful SoTL workshops the authors have offered at their institution for many years. SoTL differs from scholarly and reflective teaching in that it not only involves questioning one's teaching or a teaching strategy, but also formally gathering and exploring evidence, researching the literature, refining and testing practices, and finally going public. The purpose of SoTL is not just to make an impact on student learning, but through formal, peer-reviewed communication, to contribute to the larger knowledge base on teaching and learning. While the roots of SoTL go back some 30 years, it was Ernest Boyer in his classic *Scholarship Reconsidered* who made the case for the parity of the scholarships of integration, of discovery, of application, and of scholarship of teaching as vital to the health of higher education. Glassick, Huber, and Maeroff 's subsequent *Scholarship Assessed* articulated the quality standards for SoTL, since when the field has burgeoned with the formation of related associations, a proliferation of conferences, the launching of numerous journals, and increasing recognition and validation by institutions.

**Africa's Development Dynamics 2019 Achieving Productive Transformation** African Union Commission 2019-11-05 What are the major economic and social trends in Africa? What is Africa's role in globalisation? This annual report presents an Africa open to the world and towards the future. Africa's Development Dynamics uses the lessons learned in the five African regions - Central, East, North, Southern and West Africa - to develop recommendations and share good practices. The report identifies innovative policies and offers practical policy recommendations, adapted to the specificities of African economies. Drawing on the most recent available statistics, this analysis of development dynamics aims to help African leaders reach the targets of the African Union's Agenda 2063 at all levels: continental, regional, national, and local. Every year this report will focus on one strategic theme. This 2019 edition

explores policies for productive transformation. It proposes three main policy focus for transforming firms: providing business services to clusters of firms; developing regional production networks; and improving exporting firms' ability to thrive in fast-changing markets. This volume feeds into a policy debate between African Union's nations, citizens, entrepreneurs and researchers. It aims to be part of a new co-operation between countries and regions focused on mutual learning and the preservation of common goods. This report is the result of a partnership between the African Union Commission and the OECD Development Centre.
