Perspectives on Supported Collaborative Teacher Inquiry David Slavit 2009-06-11 Supported collaborative teacher inquiry (SCTI) describes the process of professional development in which teacher teams build collaborative structures for the purpose of inquiring into aspects of their own instructional practice. Professional development performed collaboratively and grounded in "the work teachers do" is a highly effective forum for challenging existing beliefs about content, learners, and teaching and using data and research to reflect on, and possibly change, instructional practice. The contributors to this volume describe supported collaborative inquiry as a framework for teacher professional development and provide specific empirical evidence found in examples of SCTI. The chapters focus on the building of collaborative support structures, nurturing an inquiry stance, progressing through an inquiry process, and the various kinds of support mechanisms necessary to engage in SCTI. This seminal work in teacher research will be of interest to scholars, students, teachers, and administrators seeking insight into teacher education, teacher leadership, and teacher inquiry.

Why Writing Matters Awena Carter 2009 This book brings together the work of scholars from around the world ☐ UK, Pakistan, US, South Africa, Hungary, Korea, Mexico ☐ to illustrate and celebrate the many ways in which Roz Ivanic has advanced the academic study of writing. Focusing on writing in different formal contexts of education, from primary through to further and higher education in a range of national contexts, the twenty one original contributions in the book critically engage with theoretical and empirical issues raised in Ivanic's influential body of work. In their exploration of writers' struggles with the demands of dominant literacy the authors significantly extend understandings of writing practices in formal institutions. Organized

around three themes central to Ivanic's work ☐ creativity and identity; pedagogy; and research methodologies ☐ the twelve chapters and nine personal and scholarly reflections reveal the powerful ways in which Ivanic's work has influenced thinking in the field of writing and continues to open up avenues for future questioning and research.

Completing a Professional Practice Dissertation Jerry W. Willis 2010-06-01 A growing number of both established and newly developed doctoral programs are focusing on the preparation of practitioners rather than career researchers. Professional doctorates such as the Doctor of Nursing Practice (DNP), Doctor of Education (EdD), Doctor of Pharmacy (PharmD), Doctor of Professional Studies (DProf or DPS), and the Doctor of Psychology (PsyD) are, in fact, just a few of the professional doctorates being offered today. Professional doctorates are the fastest growing segment of doctoral education. The nature of the dissertation and the process of completing a dissertation can be quite different in a professional practice doctoral program but there are few resources for both students and faculty involved in completing and mentoring such dissertations. This book was written specifically for students and faculty involved in professional practice dissertation work. It addresses both the tasks and procedures that professional practice dissertations have in common with

dissertations in "research" doctoral programs as well as the tasks and issues that are more common in professional practice doctoral programs. For example, negotiating entry into applied settings and securing the cooperation of practicing professionals is covered, as are alternative models for the dissertation (e.g., the "three article dissertation" or "TAD"). The book also covers tasks such as getting IRB approval for applied dissertation research conducted in the field and how to propose and carry out studies based on applied and professional models of research. This book, written by three experienced mentors of professional practice dissertation students, is the comprehensive guide for both students and faculty.

Structuring the Thesis David Kember 2018-07-23 The book is a collective investigation of the structuring of theses in education, the social sciences and other disciplines that commonly do not follow the standard procedures of the scientific method. To help research students design a structure for their own thesis and liberate their investigations from the constraints associated with the use of the conventional structure, it explains how the structures adopted were designed to suit the topic, methodology and paradigm. It also provides a wide range of examples to draw upon, which suit a broad spectrum of theory, methodological approaches, research methods and paradigms. Additionally, by analyzing the methodologies and paradigms, and reviewing the methodological and paradigmatic spectrum, it offers a significant contribution to the way research is conceptualized. The book addresses a number of key questions faced by students, supervisors and examiners: •Why do examiners often find it difficult to read work in non-scientific disciplines when these are structured in accordance with the conventional scientific method? •Why do students in non-scientific disciplines struggle to write up the outcomes of their research in the conventional structure? •What alternative thesis structures can be devised to better suit the wide range of methods? •Which theories and paradigms are commonly followed in education and the social sciences and how do these perspectives influence the research process? •What methods, theories and paradigms are commonly adopted by education and social science students and what problems do these pose when students write their theses? **Completing Your Qualitative Dissertation** Linda Dale Bloomberg 2018-10-17 Completing Your Qualitative Dissertation offers comprehensive step-by-step guidance and practical tools for navigating the personal and professional challenges that can arise during the qualitative dissertation journey. Authors Linda Dale Bloomberg and Maria Volpe skillfully blend the conceptual, theoretical, and practical, empowering readers to successfully master both the content and the process of their qualitative dissertations. The Fourth Edition has been thoroughly updated to respond to developments in the field, allowing the book to have wider application for dissertation work within the evolving world of qualitative inquiry. Included in this edition is a new chapter titled "Achieving Alignment Throughout Your Dissertation," a greater focus on how all qualitative traditions can encompass activist research and social justice inquiry, and enhanced coverage on the role of the researcher, emphasizing the importance of reflexivity and approaching research critically.

The Manager's Guide to Systems Practice Frank Stowell 2012-05-24 This book is an ideal resource on the subject of systems practice for busy managers whose time is scarce. It provides a rapid introduction to straightforward, yet powerful ideas that enable users to address real world problems. Systems theory and practice is predominantly a framework for thinking about the World, in which holistic views are maintained. In this respect it contrasts with some familiar techniques of management science, in which problem situations are broken down into their constituent parts with resultant loss of coherence. *The Journal of the Utah Academy of Sciences, Arts, and Letters* 2005
