The impact of the International Food Policy Research Institute's research program on rural finance policies for food security for the poor Alwang, Jeffrey 2002-12-23 This study examines the contributions of the International Food Policy Research Institute (IFPRI) between 1993 and 2001 to analysis, outreach, capacity building, and training related to the role of rural finance in poverty reduction. The IFPRI multicountry research project on Rural Finance Policies for Food Security for the Poor involved data-intensive research by more than 14 research fellows on the impacts of access to rural financial services in countries. This

report examines the contribution of the program within four countries where microfinance research and outreach activities were conducted and its contribution to global knowledge about rural finance and food security....It addresses issues of critical importance: (1) does microfinance have an impact on the poor, and is this impact achieved through better risk management as well as increased income generation?, (2) does the structure of financial service providers matter in supporting this impact?, and (3) how can the microfinance industry be made more sustainable?.... Malawi, Bangladesh, Ghana and Nepal were selected for analysis of research impacts." -- taken from Authors' Abstract.

Middle Range Theory for Nursing, Fourth Edition presents a broad spectrum of 13 middle range theories. Each theory is broken down into its purpose, development, and conceptual underpinnings, and includes a model demonstrating the relationships among the concepts, and the use of the theory in research and practice. In addition, concept building for research through the lens of middle range theory is presented as a rigorous 10-phase process that moves from a practice story to a conceptual foundation. Exemplars are presented clarifying both the concept building process and the use of conceptual structures in research design. This new edition remains an essential text for advanced practice, theory, and research courses. Smartphone-based Learning in the Japanese ESL Classroom Nicolas Gromik 2017-05-11 Mobile Assisted Learning emerged from Computer Assisted Learning, with researchers extending computer-based activities to mobile platforms, but differs from the latter in many ways. First, it is obviously mobile, but, second, smartphones have converged many features and software that were previously accessible through a range of digital tools. Thirdly, Mobile Assisted Learning allows interaction with social media. Educators are well-advised to consider smartphone video-based learning and to understand the many possibilities it affords. This book provides an account of the integration of smartphone video recording in the language classroom. It outlines and reports on the implementation process and the practical issues related to this learning method. Using simple digital storytelling, and mini-documentary filmmaking, students are able to learn to speak in a foreign language, while at the same time exploring and experimenting with video production. As such, this book will take readers on a journey through various educational concepts that enhance the formulation of a smartphone based learning approach, as well as suggesting that digital video production is not just a task, it is a 21st century skill necessary for all academics and learners.

Construction Safety Management Systems Steve Rowlinson 2004-04-29 The construction industry has a distressingly

poor safety record, whether measured in absolute terms or alongside other industries. The level of construction safety in a country is influenced by factors such as variations in the labour forces, shifting economies, insurance rates, legal ramifications and the stage of technological development. Yet the problem is a world-wide one, and many of the ways of tackling it can be applied across countries. Effective tools include designing, preplanning, training, management commitment and the development of a safety culture. The introduction and operation of effective safety management systems represents a viable way forwards, but these systems are all too rarely implemented. How can this be done? Should we go back to prescriptive legislation? This book considers these questions by drawing together leading-edge research papers from the proceedings of an international conference conducted by a commission (W099) on Safety and Health on Construction Sites of CIB, the international council of building research organisations.

Handbook of Research on Managing and Designing Online Courses in Synchronous and Asynchronous Environments Durak, Gürhan 2021-12-17 In order to be successful, online learning should be planned systematically. It can be said that offering distance education courses without preparation and knowledge about the theoretical background can cause drawbacks. While distance education has become widespread and popular, it is observed that there could be problems in its application. Such problems can include technical problems, inability to meet the learning needs at the learners' own speeds, lack of communication among learners and between learners and teachers, and lack of quality materials appropriate for online learning or the inclusion of materials used in traditional methods directly into online learning. For successful online courses, these critical aspects of distance education are important, and they should be taken into account by the institutions and the instructors offering online courses. The Handbook of Research on Managing and Designing Online Courses in Synchronous and Asynchronous Environments provides up-to-date knowledge and experiences regarding technologies, processes, and environments for online course design in distance education systems and covers topics related to the aspects of successful distance education systems with a focus on teaching and learning in online environments. Focusing on topics such as instructional design and integrated systems, it is an ideal guide for online course designers, instructional designers, curricula developers, administrators, educators, researchers, trainers, and students.
